Priya Nair

Backend Software Engineer | Bengaluru, India | priya.nair@example.com

SUMMARY

Backend engineer with 4 years of experience building and operating Python web services and REST APIs for a B2B logistics platform.

SKILLS

Languages: Python, SQL, Bash, JavaScript

Frameworks: Django, Django REST Framework, Flask, Celery

Data: PostgreSQL, Redis, MySQL

Cloud and tooling: AWS (EC2, S3, CloudWatch), Docker, GitHub Actions, Linux, Git

Practices: pytest, unit testing, code reviews, Agile, CI/CD

EXPERIENCE

Software Engineer, Tradewind Logistics (2022 - present)

• Built and maintained 18 REST APIs in Django REST Framework serving about 40,000 daily requests.

• Reduced slow PostgreSQL queries by 55% through indexing and query tuning on the shipment-tracking service.

• Introduced Redis caching for rate lookups, cutting median API latency from 420 ms to 190 ms.

• Containerised three services with Docker and automated test and deploy steps with GitHub Actions.

• Wrote pytest suites that raised coverage on the billing module from 48% to 82%.

• Participated in on-call rotation and code reviews for a team of six engineers.

Junior Developer, Cartwheel Software (2020 - 2022)

• Developed Flask services and Celery background jobs for invoice generation.

• Helped migrate a MySQL database to PostgreSQL with no recorded downtime.

• Worked on bug fixes and small features across the customer dashboard.

EDUCATION

B.E. Computer Science, Visvesvaraya Technological University, 2020
